

Which renewable resources are available in Benin?

Of all the available renewable resources in Benin, solar has the greatest potential, and is the easiest to implement for solving problems in the Republic of Benin.

Does Benin have electricity?

Electricity consumption in the Republic of Benin is highly dependent on external supplies, with 90% of the country's electricity coming from Ghana (Okanla, 2014, as cited by Kwakwa, 2018). Benin is subject to power cuts and recurrent energy crises, according to Atchike et al. (2020).

Who can benefit from a new off-grid solar scheme in Benin?

Households, smallholders and entrepreneurs in remote locations across Benin will be able to access reliable and cheap electricity for the first time under a new off-grid solar scheme agreed between leading solar energy company ENGIE Energy Access and the European Investment Bank, one of the world's largest financiers of renewable energy.

Does Benin have a good energy sector?

This paper analyzed the energy sector in the Republic of Benin, a developing country in West Africa that has many problems in meeting the needs of its population for almost all sectors over the last decade, specifically, between 2010 and 2018, in terms of production, consumption, and imports.

How much electricity is produced by biomass in Benin?

Electricity production using biomass in Benin was zero, similar to other WAEMU member countries, except for the Ivory Coast and Burkina Faso, which accounted for 53.4% and 46.6% of all electricity production (114.5 GWh), using biomass in 2018, respectively.

Why is Benin importing more electricity from neighboring countries?

In recent decades, Benin has experienced several energy crises that have forced it to import more electricity from neighboring countries like Ivory Coast, Ghana, and Nigeria, via the West African Power Pool (WAPP), to meet demand for its population. The worst crisis occurred from 2007 to 2013.
