

# Solomon Islands solar innovations

How many solar homes are there in the Solomon Islands?

"Solomon Islands currently has one of the lowest levels of access to electricity in the region, with over 85% of the population of Solomon Islands still without access to electricity and for this project alone, we received over 6,000 applications to obtain only 2,000 solar home systems," said Mr Aimaema.

Is there access to energy in the Solomon Islands?

Honiara, Solomon Islands - Access to energy in Solomon Islands is a widespread issue. Supply is unreliable and cost unaffordable for most of the population. In rural areas this is an even greater issue, with access almost non-existent.

Can accelerated deployment of renewables address energy transition challenges in the Solomon Islands?

The new report finds that accelerated deployment of renewables and the uptake of energy transition innovative solutions in the Solomon Islands can address the challenges. To drive action towards accelerated energy transition, the government already aspires to achieve 100% electricity access and zero emissions by 2050.

What challenges do the Solomon Islands face?

With an electricity access rate of 76%, the Solomon Islands continues to grapple with energy security and sustainability, especially in the outer islands and remote communities. These challenges are compounded by rapid population growth and a high poverty ranking.

Why is the SPIRES project a beacon of hope for the Solomon Islands?

The success of the SPIRES project stands as a beacon of hope for the Solomon Islands. As UNDP Programme Manager Ms. Vini Talai summarized, "Villagers will now be able to use electricity to stimulate economic growth in their communities through increasing production of goods by switching from using manual tools to electric equipment."

Can solar power save the lives of hunanawa residents?

The installation of a 30kWp solar PV system, accompanied by a battery bank, now illuminates the lives of over a hundred households- 50 of them nestled within the heart of Hunanawa but also reaching the surroundings. Beyond providing electricity, the SPIRES project brings a model for a more sustainable future.
