

Through Nilepet's JV with South Africa's Strategic Fuel Fund - the Nile Orange Energy Project - the NOC and its partner recently completed its initial survey over South Sudan's Block B2, setting the stage for further exploration activities. The survey was conducted by the South Sudan Geophysical Company, demonstrating the potential to ...

Through the Nile Orange Energy Project, the Governments of South Africa and South Sudan have agreed to jointly cooperate on various potential projects within the South Sudanese oil industry.

Through Nilepet's JV with South Africa's Strategic Fuel Fund - the Nile Orange Energy Project - the NOC and its partner recently completed its initial survey over South Sudan's Block B2, setting the stage for further exploration activities.

SFF, which is the operator of Block B2 in South Sudan and partner of Nilepet in the Nile Orange joint venture, has begun its oil and gas exploration campaign in Jonglei state and finished its initial aerial survey last month. In the meeting, the companies provided updates on activities required to continue work to the next phases.

The SFF, which operates Block B2 in South Sudan and collaborates with Nilepet through the Nile Orange joint venture, has recently completed a major phase of its oil and gas exploration campaign in Jonglei state. The initial aerial survey of the block was finished last month, setting the stage for further exploration activities.
