

How does the EU support Saint Vincent and the Grenadines?

Saint Vincent and the Grenadines is a Small Islands Development State which is highly dependent on a limited number of economic sectors, vulnerable to exogenous shocks especially natural disasters. The EU supports Saint Vincent and the Grenadines towards sustainable and inclusive development, in line with the Global Gateway Strategy.

What are the main economic pillars of Saint Vincent and the Grenadines?

Its major economic pillars are tourism and agriculture, primarily banana production. Saint Vincent and the Grenadines is a Small Islands Development State which is highly dependent on a limited number of economic sectors, vulnerable to exogenous shocks especially natural disasters.

Where is Saint Vincent & the Grenadines located?

Saint Vincent and the Grenadines is an upper middle-income located in the Eastern Caribbean with a population of over 100 000 (2023). Its major economic pillars are tourism and agriculture, primarily banana production.

Over the course of April in Saint Vincent and the Grenadines, the length of the day is gradually increasing from the start to the end of the month, the length of the day increases by 20 ...

Over the course of March in Saint Vincent and the Grenadines, the length of the day is gradually increasing from the start to the end of the month, the length of the day increases by 22 ...

This is the Energy Report Card (ERC) for 2022 for St. Vincent and the Grenadines. The ERC provides an overview of the energy sector performance, highlighting the following areas: o Installed Conventional and Renewable Power Generation Capacity

The solar PV systems will displace some of the diesel fuel used for electricity generation. The BESS is expected to optimise the operation of the solar systems and also improve the energy efficiency of VINLEC's system by providing spinning reserve thereby reducing the diesel fuel used by the generators for this purpose.

The first solar in St Vincent and the Grenadines was a 177kW grid tied PV system commissioned at Vinlec's Cane Hall Engineering Complex on St Vincent in 2013, which was followed by a 370kW system at Lowmans ...

The Caribbean Development Bank is supporting St. Vincent and the Grenadines' push to expand and increase its range of renewable energy options through a planned solar energy project. ... comprised of EUR1.6 million ...

The solar PV systems will displace some of the diesel fuel used for electricity generation. The BESS is expected to optimise the operation of the solar systems and also improve the energy efficiency of VINLEC's system ...

The Caribbean Development Bank has approved financing of \$8.6 million to St Vincent Electricity Services Ltd (Vinlec) for the supply and installation of solar photovoltaic (PV) systems at company buildings in the vicinity of the Argyle International Airport.

This document presents St. Vincent and the Grenadines' Energy Report Card (ERC) for 2021. The ERC provides an overview of the energy sector performance in St. Vincent and the Grenadines. The ERC also includes energy efficiency, technical assistance, workforce, training and capacity building information, subject to the availability of data.

Countries, where EU-CIF SEEC resources are being used together with CDB's E& M resources for the supply and installation of the PV plant, for the Building Energy Efficiency Works and for inspection and certification engineering services. .

The Commissioning of the Union Island Solar PV and Battery Energy Storage System on March 25th, 2019 has been hailed as a significant milestone in the energy sector of ...

This document presents St. Vincent & the Grenadines Energy Report Card (ERC) for 2019. The ERC provides an overview of the energy sector performance in St. Vincent & the Grenadines. The ERC also includes energy efficiency, projects, technical assistance, workforce, training and capacity building information, subject to the availability of data.

The Commissioning of the Union Island Solar PV and Battery Energy Storage System on Monday 25th March 2019 has been hailed as a significant milestone in the energy sector of Saint Vincent and the Grenadines.

Over the course of February in Saint Vincent and the Grenadines, the length of the day is gradually increasing. From the start to the end of the month, the length of the day increases by ...

The month of January in Saint Vincent and the Grenadines experiences essentially constant cloud cover, with the percentage of time that the sky is overcast or mostly cloudy remaining about ...

The Caribbean Development Bank has approved financing of \$8.6 million to St Vincent Electricity Services Ltd (Vinlec) for the supply and installation of solar photovoltaic (PV) systems at company buildings in the ...
