

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment

Why should the Gambia invest in solar energy?

To match the rising demand and to provide sustainable and accessible energy to all Gambians, the potential for solar energy investment is immense in The Gambia. The government of The Gambia seeks to increase RE's contribution to 40% from 2% presently in the coming years.

Will the Gambia build a solar farm in Soma?

The Gambia will build a 150 MW solar farm near the planned 250kV/30kV substation in Soma, to either upload power to stabilize the Gambian grid or for injection into the West African Power Pool or both, depending on conditions.

Will ECOWAS build a solar power station in Gambia?

In October 2022, a meeting was convened in Banjul, Gambia's capital city, in which representatives of the member countries of ECOWAS validated the feasibility study for the construction of the 150 MW Soma Solar Power Station, in Soma, Gambia.

Is Gambia ready for a new era of renewables?

Gambia: strong international support for a new era of renewables with inauguration of historic 23 MWp solar plant. A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in Jambur is poised to supply electricity to approximately 18,500 households.

Why is NAWEC launching a solar plant in the Gambia?

This marks the first time in the Gambia's history where a utility scale solar plant of 23 Megawatts Solar PV capacity and 8-Megawatt hours battery storage is being commissioned. This solar plant allows NAWEC to finally shift away from expensive heavy fuel oil-based generation which is costly and harmful to the environment.

The Gambia entered a new era of energy development in April 2023 with the inauguration of its first large-scale solar energy facility in Jambur. Built by Chinese manufacturer Tebian Electric Apparatus, the 23 MW solar ...

The President of the Republic of The Gambia Adama Barrow was in Jambur on 4 February 2023 for the ground-breaking ceremony of a 23 MW solar power plant, the largest solar park in the country, which will be

State solar The Gambia

used to ...

As we inaugurate the first grid-tied Solar PV Plant today, the Government is working with partners to implement a 150 MWp regional solar power park. We plan to launch the tender for the first 50 MWp in the second ...

Investment in Grid-Connected Solar PV in The Gambia. The specific deliverable within the Terms of Reference of the engagement, dated 8 June 2018, is as follows: ... The Gambia is a ...

SummaryLocationOverviewDevelopmentsSee alsoExternal linksThe Soma Solar Power Station is a planned 150 megawatts solar power plant in Gambia. The two lead developers of this renewable energy infrastructure are the Government of Gambia and the Economic Community of West African States (ECOWAS). The World Bank and the European Investment Bank, have jointly committed US\$164 million in loans towards this development.

We offer a number of solar-powered sustainability services, with a wide array of uses. Whatever your sustainability needs, you can trust the largest and one of the most reputable solar ...
