

How can Tajikistan strengthen and expand electricity trade?

Based on these considerations, for Tajikistan to strengthen and expand electricity trade, the IEA recommends a roadmap focused on three key points: Ensure favourable conditions to enable multilateral electricity trade. Adopt multilateral market models to expand electricity trade.

What are the benefits of cross-border electricity trading in Tajikistan?

Cross-border electricity trading can bring a number of benefits to Tajikistan and its neighbouring countries. It has implications for economics, energy security and the integration of variable renewables.

How can trans-border transmission planning help Tajikistan prepare for expanded regional trade?

In the cases of SIEPAC, WAPP and SAPP, cross-border transmission planning has been supported by feasibility assessments co-ordinated by international development agencies. Ensuring a reliable domestic power sector capable of attracting sufficient investment can help Tajikistan prepare for expanded regional trade.

What is electricity trading in Tajikistan?

Most electricity trading arrangements in Tajikistan today are long-term bilateral contracts with limited options for variations in volumes or price.

Why does Tajikistan need interconnecting power systems?

In the case of Tajikistan, it provides a bigger market to which it can sell its hydropower surpluses. In energy security terms, interconnecting power systems offers a more diverse energy supply and reduces the impact of disruptions.

Why should Tajikistan regulate the power sector?

Effective regulation enforces market discipline for utilities and can contribute to their financial viability. In addition to these principles, Tajikistan would profit in appropriately preparing power sector systems and operations for expanded trading opportunities.

Opening Ceremony of Afghan-Tajik Bridge Preparation of Opening Ceremony of Afghan-Tajik Bridge.
