

The Gambia solar panel field

Why should the Gambia invest in solar energy?

To match the rising demand and to provide sustainable and accessible energy to all Gambians, the potential for solar energy investment is immense in The Gambia. The government of The Gambia seeks to increase RE's contribution to 40% from 2% presently in the coming years.

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment

How does a large scale solar PV project benefit the Gambia?

The project contributes to gainful employment creation in The Gambia with 1,250 direct jobs created from the construction phase to operation and maintenance. To ensure sustainability, a three-year operations and maintenance contract (O&M) has been signed as large scale solar PV is entirely new to the sector.

Why is NAWEC launching a solar plant in the Gambia?

This marks the first time in the Gambia's history where a utility scale solar plant of 23 Megawatts Solar PV capacity and 8-Megawatt hours battery storage is being commissioned. This solar plant allows NAWEC to finally shift away from expensive heavy fuel oil-based generation which is costly and harmful to the environment.

Why is the World Bank partnering with the Gambia?

"The World Bank is pleased to join The Government of The Gambia to witness this remarkable milestone in the Energy Sector. This marks the first time in the Gambia's history where a utility scale solar plant of 23 Megawatts Solar PV capacity and 8-Megawatt hours battery storage is being commissioned.

Is Gambia ready for a new era of renewables?

Gambia: strong international support for a new era of renewables with inauguration of historic 23 MWp solar plant A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in Jambur is poised to supply electricity to approximately 18,500 households.

We offer a number of solar-powered sustainability services, with a wide array of uses. Whatever your sustainability needs, you can trust the largest and one of the most reputable solar ...

As the first of its kind, The Gambia's solar park will increase Gambians' access to electricity by 25 percent. The park will serve as one of the administration's first steps in transforming the nation into a hub for sustainable ...

The Gambia solar panel field

The Gambia entered a new era of energy development in April 2023 with the inauguration of its first large-scale solar energy facility in Jambur. Built by Chinese manufacturer Tebian Electric Apparatus, the 23 MW solar ...

SummaryLocationOverviewDevelopersConstruction costs, funding, and commissioningSee alsoExternal linksThe Jambur Solar Power Station (JSPS), is an operational 23 MW (31,000 hp) solar power plant in Gambia. The power station began commercial operations in March 2024. It is owned and was developed by the government of Gambia, with funding from the European Union, the European Investment Bank and the World Bank. The power generated here is integrated into the Gambian national electricity grid, through the National Water and Electricity Company network.

Agrivoltaics, which pairs solar panels with farming, offers a path to decarbonise agriculture. But how do we make it work for crops and energy? ... How farmers can install solar panels in fields ...

On Saturday, at a historic occasion in the Community of Kombo Jambur, President Barrow led the official inauguration ceremony of the now completed 23 Megawatt Solar Plant and an eight Megawatt Battery Energy ...
