

The Gambia suncode energy

How much solar power does the Gambia have?

According to the International Renewable Energy Agency (IRENA), The Gambia only had 2 MW of installed solar photovoltaic capacity at the close of 2022. Similarly, in the realm of wind energy, only small-scale projects initiated by private investors and non-governmental organizations are currently in operation.

Why is access to electricity important in the Gambia?

Providing access to electricity to support inclusive and sustainable socio-economic development is one of the pivotal cornerstones of the Gambia government's priorities as articulated in the national energy sector policies and strategies, and highlighted in the National Development Plan (2018-2021).

What is a roadmap for the electricity sub-sector of the Gambia?

The roadmap represents the strategic masterplan for the electricity sub-sector of The Gambia fully consistent with the macroeconomic, energy, investment and climate-related policies of the government of The Gambia and embodies the high-level vision of the Government for the development of the sector over the next 20 years.

Will the Gambia achieve universal access to electricity by 2025?

The Gambia aims to achieve Universal Access to electricity by 2025, as stipulated by H.E President Adama Barrow. NAWEC will implement this goal primarily through its grid infrastructure, benefiting from the country's favourable geography.

Why should the Gambia invest in a solar-with-storage IPP?

Solar: with dramatically falling solar and battery storage costs, and abundant solar resources in The Gambia, competitively procured solar-with-storage IPPs offer The Gambia an excellent opportunity to introduce clean and low cost energy into the mix.

Why is a solar power plant important in the Gambia?

H.E. Corrado Pampaloni, Ambassador of the European Union to The Gambia "This power plant is part of the "Gambia Electricity Restoration and Modernization Project" and it is particularly important for the achievement of a swift transition towards solar power and clean energy supply across the country.
