What is the Transcendental Meditation technique?. The TM technique is a very simple--yet very effective--way to enjoy inner calm, dissolve stress, and get more out of life. TM practice is easy and enjoyable.

A timeless technique for living well. Transcendental Meditation ® is a natural, evidence-based technique to increase resilience, enhance health, and sharpen mental clarity. Unlock your full potential with this ancient practice for contemporary life.

Imagine trying to learn a musical instrument or sport. You know how valuable it is for a good teacher to show you the proper technique. Similarly, individualized instruction by certified TM teachers ensures a personal and intuitive learning experience, allowing students to learn the technique with ease and precision, and to establish a lasting TM practice.

To ensure the success of each student, the TM technique is taught exclusively by certified teachers. These personalized and comprehensive sessions will give you a solid foundation for a lifetime of benefits from your TM practice.

To ensure the success of each student, the TM course is taught exclusively by certified teachers over four consecutive sessions. The first session is always in-person, but the following three sessions can be either done in person or at home (via interactive digital content and live video meetings with your teacher).
