

How much electricity does Tunisia get from renewable sources?

Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW). In addition to wind and hydro, the Tunisian government plans to use biogas to produce renewable energy.

What is the energy sector in Tunisia?

The energy sector in Tunisia includes all production, processing and transit of energy consumption in this country. The production involves the upstream sector that includes general oil and gas, the downstream sector that includes the only refinery in Tunisia and most of the production of natural gas, and varied electrical/renewable energies.

Does Tunisia have natural gas?

In addition to local gas production, Tunisia receives natural gas as a royalty on the Algerian Transmed gas pipeline crossing Tunisia to Italy. In 2022, only 3% of Tunisia's electricity is generated from renewables, including hydroelectric, solar, and wind energy.

Does Tunisia have a solar power plant?

First utility-scale photovoltaic plant (10 MW, in Tozeur) was commissioned in 2019 on German money. Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW).

Does Tunisia have a green wave of energy production?

This creates the overlap for biogas to take on some level of energy production in Tunisia's continued green wave of energy production. In 2016, Tunisia emitted 29 Mega tons of carbon dioxide equivalent (MtCO₂e) in greenhouse gases. The country aims to reduce its carbon intensity by 13% in 2030, compared to 2010 levels.

Who produces electricity in Tunisia?

State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity. The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer (IPP) Carthage Power Company (CPC), a 471-MW combined-cycle power plant.

Contact FGC Energy for reliable and efficient rig move and heavy equipment rental services. With a highly skilled team and a commitment to safety and professionalism, we deliver cost ...

Tunisia has embarked on an impressive path toward renewable energy and energy efficiency. The Government

Tunisia fgc energy

released an update to the Tunisia Solar Plan in 2018-- an ambitious roadmap for their energy sector--which ...

FGC Energy, a leading provider of rig move services, has formed a transformative joint venture with Petroleum Well Services Co. FGC Energy achieved a significant milestone by creating the largest crew of Saudi ...

The large-scale development of renewable energy could catalyze economic growth in Tunisia in several ways: firstly, by reducing energy cost and decreasing the need for subsidies; secondly, by making this energy ...

Tunisia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas ...

Tunisia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas ...

Discover rewarding career opportunities at FGC Energy Company. We prioritize the recruitment, training, and advancement of Saudi nationals, fostering a collaborative work environment. ...
