

Turks and Caicos Islands amg italian energy storage

Who owns Turks & Caicos utility limited (TCU)?

Turks & Caicos Utility Limited (TCU) is wholly owned by FortisTCI and provides electricity to Grand Turk and Salt Cay. In 2010, the government of Turks and Caicos contracted with a consultant to draft recommendations for exploring the use of renewable energy and energy efficiency technologies to create a more sustainable energy framework.

What does the energy bill mean for the Turks and Caicos Islands?

In this vein,the bill introduced in the House of Assembly on Thursday, November 2,2023, aims to transform the energy landscape in the Turks and Caicos Islands by fostering energy independence and promoting economic growth.

Who owns Turks & Caicos electric grid?

The government-owned Turks and Caicos electric grid was privatized in 2006 through a series of acquisitions to create a vertically integrated structure. FortisTCI,a wholly owned subsidiary for Fortis Inc.,is an international utility holding company that owns and operates generating stations and dis-tribution lines across the islands.

Does Turks and Caicos have a policy on energy eficiency?

Turks and Caicos has few policies related to energy eficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-eficient technologies.

How much does electricity cost in Turks and Caicos?

The 2015 electricity rates in Turks and Caicos are \$0.29 per kilowatt-hour (kWh), slightly below the Caribbean regional average of \$0.33/kWh. Like many island nations, Turks and Caicos is almost 100% reliant on imported fossil fuel, leaving it vulnerable to global oil price fluctuations that have a direct impact on the cost of electricity.

Could ocean thermal energy help Turks and Caicos meet its peak demand?

Once wave and ocean thermal technologies are proven in the marketplace, ocean energy and ocean thermal energy conver- sion have potential as well. Abundant wind and solar resources, as well as the potential for other renewable sources could help Turks and Caicos meet or exceed its peak demand of 34.7 MW.

Turks and Caicos Energy Forum brings together local, regional, and international energy experts, public and private sector decision-makers, and a wide cross-section of stakeholders, to discuss ideas and trends affecting the future of energy. The forum is hosted by FortisTCI, the public energy provider in the Turks and Caicos Islands.
