

In most parts of the Cayman Islands, power is provided by a utilities company called Caribbean Utilities Company (CUC), which uses diesel generators to fuel the power grid in densely populated and developed areas on the islands, particularly in Grand Cayman. Overall, the grid is highly reliable, and CUC customers can easily report outages and ...

UCAP Power(TM), a global provider of ultracapacitor-based power solutions across a wide range of renewable markets. Ultracapacitor systems use sustainable based products offering a long-lasting source of reliable high-power energy storage that can help eliminate lead-acid and other hazardous materials in batteries.

Caribbean Utilities Company, Ltd., known locally as CUC, commenced operations as the only public electric utility in Grand Cayman, the largest of the three Cayman Islands, in May 1966. The Company has been through many challenging and exciting periods but has kept pace with Grand Cayman's rapid development for over 57 years.

The electricity supply in the Cayman Islands is managed by the Caribbean Utilities Company (CUC), a publicly traded company that has been providing electricity to the islands since the 1960s. CUC operates two power plants on Grand Cayman, one on Cayman Brac, and a small generating facility on Little Cayman.
