The European Commission has approved EUR19.8 million (US\$20.1 million) in state aid from the government of Croatia to energy storage operator IE-Energy for a series of grid-connected projects. The aid will be a direct grant to IE-Energy and will cover approximately 30% of capital expenditures for a series of grid-scale battery energy storage ...

The goal of the Call is to facilitate the deployment of 20MWh of energy storage and 80MW of renewable energy projects. It is also targeting energy efficiency projects totalling 140,000MWh of energy a year, and has the overall goal of reducing CO2 emissions by 60,000 tonnes annually.

Croatia's renewable energy industry Renewable sources supply around 30% of Croatia's energy needs, but only two percent is solar energy. The potential for solar energy is estimated at 6.8GW (majority in utility-scale or ground system PV plants and 1.5 GW for rooftop solar systems). Building-, floating solar panels or

Croatia got the green light from Brussels to give a EUR 19.8 million grant to a domestic startup for a massive energy storage project. IE-Energy is planning to build a battery ...

Croatia, a Mediterranean country with a diverse energy portfolio, is embracing the potential of grid-scale/utility-scale energy storage systems (ESS). In this article, we will delve into the current state of the ESS industry in Croatia, highlight new projects under construction, explore the major drivers propelling this growth, and offer an ...

The European Commission has allocated EUR19.8 million in the form of state aid for a number of projects for grid-scale energy storage. The subsidy was awarded to the company IE-Energy from Rijeka. This amount will cover about 30 percent of the costs for the series of battery systems planned for construction around the city of Zibenik.

It is "too slow" to get a utility-scale solar project in Croatia finalized, said Zvonimir Meštrović, head of solar business development at Zagreb-based renewable energy company ENCRO.

Hrvatska elektroprivreda, or HEP, is Croatia's main transmission system operator and utility. Image: CC / Flammard. Central and Eastern Europe (CEE)-based developer and independent power producer (IPP) Woodburn Capital is deploying a co-located battery storage project in Croatia, with final regulations around connecting batteries to the grid ...
