

Why should you choose Valtech energy?

This specificity allows for Valtech Energie to have proven expertise in the operation and analysis of industrial processes involving the combustion of carbonaceous or non-carbonaceous fuels. We have developed an expertise in numerical simulation (CFD: computational fluid dynamics) of thermal equipment and processes.

How is electricity produced in Seychelles?

Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW on Praslin). Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated.

What is Valtech?

Valtech is a global digital agency focused on business transformation. The company, historically positioned as a traditional IT services provider, has been transformed by its current management team into a company that addresses the new needs of business leaders in a digital-focused era.

How many employees does Valtech have?

Founded in 1993 Valtech now has 5,500+ people with diverse skill sets across 60+ offices in 20+ countries.

What is Seychelles' energy policy?

Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated. This 6 MW power plant can produce up to 2% of the Seychelles' power and is located on Mahé Island. It is expected that the wind farm will replace 1.6 million litres of diesel fuel annually.

Is biomass a source of electricity in Seychelles?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Seychelles: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

The Seychelles Government is working to increase the share of renewable energy in the electricity matrix to 5 percent by 2020 and 15 percent by 2030. Could residues from the agriculture and agro-processing sectors, including waste provide an alternative?

Our energy optimization services for thermal equipment and processes target all energy-intensive equipment, production lines and processes in all industrial and manufacturing sectors. We also target thermal power plants and individual boilers. Our compliance and appliance safety services cover all thermal equipment using a fuel source.

Project performance monitoring (see the appropriate page in the list of financial assistance)

The floating solar plant is a game-changer for Seychelles, providing a reliable source of renewable energy and contributing to the country's sustainable development. We are especially proud to sign the first Seychellois ...

Breaking the world's reliance on fossil fuels and accelerating the global uptake of renewable energy will play a decisive role in diminishing the threat of global warming to the survival of life...

Composed of passionate professionals and accumulating many years of experience in the field of management and improvement of thermal processes, the Valtech Energie team will meet all of your expectations and ambitions. We are proud to offer consulting services focused on achieving all of your goals.

Renewable energy in Seychelles is a recent development in providing power to the country. Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW on Praslin). [1] Energy policy calls for 15% renewables by 2030.

With this report, Seychelles has a pathway for using biomass to reduce their fossil fuel dependency and fulfil their commitments under Sustainable Development Goal number 7, to ensure access to affordable, reliable, sustainable and clean energy for all."

Seychelles: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

The floating solar plant is a game-changer for Seychelles, providing a reliable source of renewable energy and contributing to the country's sustainable development. We are especially proud to sign the first Seychellois PPA for a floating solar plant on Energy Observer, our partner zero-emission vessel."

Seychelles: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

The Seychelles Government is working to increase the share of renewable energy in the electricity matrix to 5 percent by 2020 and 15 percent by 2030. Could residues from the agriculture and agro-processing sectors, ...
