Vanguard Renewables is a portfolio company of Global Infrastructure Partners(GIP),a part of BlackRock. © Copyright 2024 - Vanguard Renewables. All Rights Reserved This site uses cookies as described in our Privacy Policy.

How is Yemen dealing with energy problems?

Yemen is dealing with the dilemma of energy networks that are unstable and indefensible. Due to the fighting, certain energy systems have been completely damaged, while others have been partially devastated, resulting in a drop in generation capacity and even fuel delivery challenges from power generation plants.

What is the energy mix in Yemen?

However,Yemen's current energy mix is dominated by fossil fuels(about 99.91%),with renewable energy accounting for only about 0.009%. The national renewable energy and energy efficiency strategy,on the other hand,sets goals,including a 15% increase in renewable energy contribution to the power sector by 2025 (Fig. 11).

Is Yemen a good place for wind energy?

Yemen has a long coastline and high altitudes of 3677 m above sea level,making it an ideal location for wind energy generation,with an estimated 4.1 h of full-load wind per day. The wind energy can be converted into mechanical and electrical energy,and it could be a viable option for bolstering the electricity power sector.

Is there a new power plant in Yemen?

In August 2013, Yemen began construction of a new 400 MW (Ma'rib II) gas-fired power generation facility, which is scheduled to start operation at the end of 2014, but was delayed to the recent years due to the recent security turmoil (Economic Consulting Associates Limited 2009; Arab Union of Electricity 2015; U.S. 2017; Rawea and Urooj 2018).
