

Vat on energy storage income

Are solar and energy storage installations subject to VAT?

All solar and energy storage installations, including maintenance to existing sites, should be subject to 0% VAT. This should include residential energy storage when installed as a standalone measure.

Is a battery energy storage system exempt from VAT?

Image: Eaton. The UK government has removed the 20% for retrofitted battery energy storage systems (BESS), effective 1 February 2023. From the Spring Statement in 2022, energy saving domestic equipment such as heat pumps and roof-mounted solar have been exempt from the VAT.

What is the VAT rate on solar?

VAT on a range of domestic energy efficiency and renewable energy installations, including solar, is now 0% in Great Britain. This is a reduction from the previous rate of between 5% and 20%. Eligible installations are those included on the Government's list of Energy Saving Measures (ESMs).

Will electric battery storage be a part of the VAT relief?

"The government agrees with respondents, though, that this technology meets all of the stated objectives for this VAT relief in its own right, and will therefore bring electrical battery storage within the scope of the relief.

Should the VAT zero rate be extended for energy saving materials?

Following the Spring Budget 2023, HMRC launched a call for evidence seeking views on whether the VAT zero rate for the installation of energy saving materials (ESMs) should be extended. The call for evidence considered the extension of the relief to additional technologies and to installations of ESMs in charitable premises.

Are solar thermal and PV systems subject to VAT?

Solar thermal and PV systems are included on the list of ESMs. Their supply and installation are now subject to 0% VAT in Great Britain. In Northern Ireland, the previous rules remain in force. This means that solar is subject to 20% VAT unless a reduced rate of 5% applies.
