

How much energy storage will Wood Mackenzie have in 2025?

Wood Mackenzie and ESA expect five times more energy storage capacity to be installed in 2025 than in the record-breaking 2020. "The US installed 3,115MWh of storage from 2013 through 2019, a total that 2020 beat in a single year," says Dan Finn-Foley, Wood Mackenzie's head of energy storage.

What are Wood Mackenzie's Bess integrator market share rankings?

Wood Mackenzie's BESS Integrator market share rankings are based on the number of BESS shipments in megawatt-hour (MWh) in 2022. Only shipments with revenue recognised in the reporting year are counted towards the market share. The number included both grid-scale and CCI sectors. The ranking is built upon careful tracking of the global landscape.

How many megawatts did Wood Mackenzie install in Q2 2023?

Wood Mackenzie's install numbers are a little lower in megawatt terms than those reported by S&P Global, which produced its own report in late August. S&P Global Commodities said 1.931GW was deployed in all segments in Q2 2023.

How is Wood Mackenzie ranked?

The ranking is built upon careful tracking of the global landscape. Wood Mackenzie's primary data collection comes from annual BESS integrator surveys, public filings, project databases and discussions with system integrators, EPC providers and project developers. Where necessary, market-based estimates are made.

Huawei and BYD were among the five largest battery energy storage system (BESS) integrators globally last year, with the Chinese market going through a "price war" of competition, according to research from Wood ...

The Fund invests in equity securities of exchange-listed companies globally involved in the investment themes of Battery and Energy Storage Solutions ("BESS") and Innovation. The value chain of BESS ...

New data from research company Wood Mackenzie and the US Energy Storage Association (ESA) illustrates how far energy storage has come in the world's largest market. More than 2,100 megawatt-hours (MWh) of energy ...

The U.S. energy storage monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association. Each quarter, we gather data on U.S. energy storage deployments, prices, policies, ...

Wood Mackenzie's BESS Integrator market share rankings are based on the number of BESS shipments in megawatt-hour (MWh) in 2022. Only shipments with revenue recognised in the reporting year are counted towards ...

Robert Liew, director of APAC power and renewables research at Wood Mackenzie, pointed out that market evolutions and technology revolutions have disrupted legacy business models, creating a...

The global Battery Energy Storage Systems (BESS) integrator market has grown increasingly competitive in 2022, with the top five global system integrators accounting for 62% of overall BESS shipments (MWh), ...

Wood Mackenzie expects to see 62GW of cumulative grid-scale deployments in that five-year timeframe, and about 12GW of distributed-scale deployments, of which the vast majority, about 10GW, will be residential.
