

Wayu energy Namibia

Who is Wayu energy?

We specialise in the origination, development, financing, construction, and optimisation of solar PV assets across Southeast Asia. Wayu Energy is an investment platform established to focus on renewable energy solutions, including solar, wind, and hybrid systems across Southeast and Northeast Asia.

What is Wayu energy's strategy?

Wayu Energy's strategy is to invest in or acquire late-stage development or operating assets across its core markets. Diversify the asset class across utility scale solar, C&I solar, floating solar, as well as hybrid solutions in different sectors ranging from manufacturing, retail and distribution to telecom.

Will Namibia become a supplier of energy?

Once Namibia has successfully incubated the green hydrogen economy, it will enable the country to become a supplier of energy, rather than an importer.

Does Namibia need a power trading system?

The required infrastructure for power trading already exists. About 40% of Namibia's power currently comes from South Africa and is primarily driven by coal-fired power plants. We imagine a reality where Namibia exports clean energy to South Africa thereby assisting the Southern African region to decarbonize.

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

By harnessing its solar and wind resources, Namibia can reduce its reliance on imported energy, promote energy security, and mitigate the environmental impact of fossil fuels. Moreover, increased access to reliable ...
