Are China's energy storage plants being investigated for fire risks?

REUTERS/Kim Hong-ji/File Photo Purchase Licensing Rights BEIJING, July 8 (Reuters) - Chinese authorities are considering ordering large-scale investigations of energy storage plants for fire risks, in a sign of tighter standards for China's booming battery energy storage industry, the 21st Century Business Herald reported on Monday.

Did China's Investment hype cloud the development of battery storage?

Notably, the accident took place just two weeks after a fire broke out in an LG Chem battery unit in S. Korea. Safety is one of the chokepoints of the global development of battery storage. In China, the investment hype on electrochemical energy storage in recent years might have clouded the issue.

Will China's energy storage bloom be disturbed?

China's energy storage bloom is unlikely to be disturbed in the long run, but the explosion in Apr. 16 brought clear short-term negative impacts on the nascent battery storage sector. Investment opportunities lie in safer energy storage technology or alternatives, especially those suitable to utility scale and long-form storage.

Are battery energy storage systems a fire hazard?

Cross-Safety.org wrote in their report "CROSS Safety Report Battery Energy Storage System concerns" in May 2023 that a safety panel in the UK agreed that "there are significant fire safety concerns related to BESSs.

Are China's new energy storage systems based on lithium-ion batteries?

New energy storage systems in China are largely based on lithium-ion battery technology, according to the article. China has allegedly pushed for the development of renewables as it strives to meet President Xi Jinping's pledges to achieve carbon neutrality by 2060.

Are China's energy storage plants safe?

Many of China's energy storage plants at renewables facilities, built to fulfil local government mandates, have been little used and could unknowingly pose safety risks, the 21st Century report added, citing a person with knowledge of the matter.
